FEARLESS WALLET NOW SUPPORT XCM

Fearless Wallet v2.3.1 update is now live on both iOS & Android! Major addition: XCM cross-chain transfers that enable seamless swaps across most popular parachains within the Polkadot and Kusama Network ecosystem.

OAK & TURING NETWORK BRING TRANSACTION AUTOMATION TO MOONRIVER DEVELOPERS

Moonbean, has announced a powerful new functionality that will bring transaction automation to Moonriver.Turing and OAK are developer-focused chains focused on triggering remote on-chain and cross-chain automated transactions.

This integration demonstrates the power of the parachains to access specialized functionality on other parachains to seamlessly interoperate.

This XCM integration with the Turing Network, makes it possible for developers to automate transactions, and also allows the movement of MOVR to Turing and TUR, Turing's token, for use as an XC-20 inside Moonriver's broad DApp ecosystem.

OSAKA IN NEUROLANCHE

Neurolanche X Labs produces web3-based projects on Polkadot like Nft's collection and
First VR Metaverse developed by Unreal Engine 5

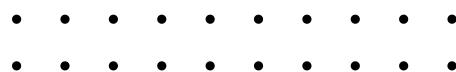

Neurolanche team are creating a decentralized and multi-chain metaverse that brings together nft communities on different blockchain networks, a blockchain-based security protocol for brain chips, and blockchain-based solutions for Alzheimer's, Dementia and Parkinson's diseases.

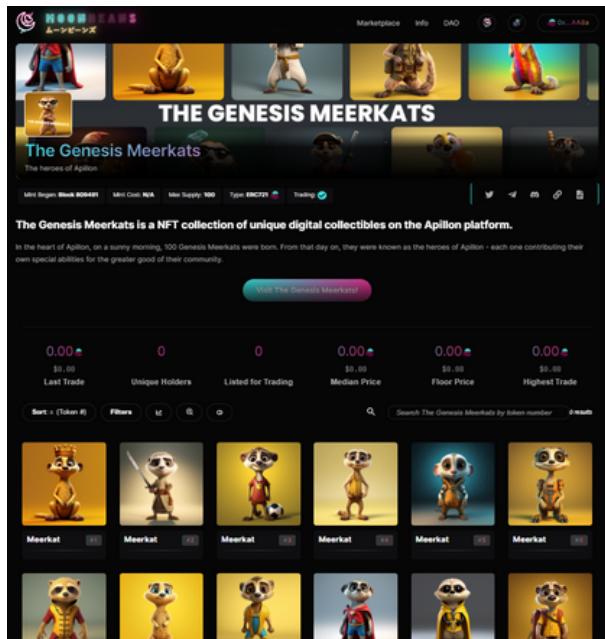

THE SUBSOCIAL ROADMAP: ACHIEVEMENTS OF TODAY, GOALS FOR TOMORROW

Released their Off-Chain Signer technology, solving the Web3 onboarding problem once and for all. With this tech, you can use supported applications like PolkaVerse and Grill.chat

THE GENESIS MEERKATS ARE AVAILABLE ON SECONDARY MARKET MOONBEANS!

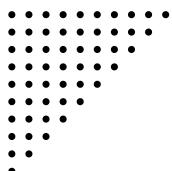

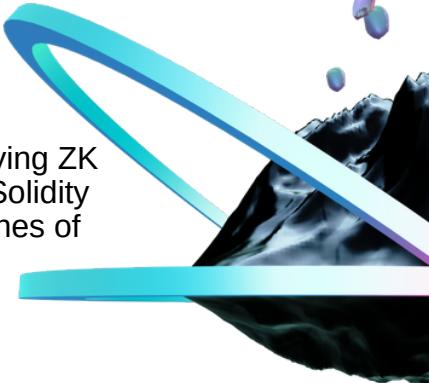

In the heart of Apillon, on a sunny morning, 100 Genesis Meerkats were born. The community looked at them with admiration. "I can't believe we have so many new heroes!" said Papillon, one of the older meerkats. "They will be the strongest generation we've ever seen," replied Aporia, another elder member of the community.

MANTA PACIFIC

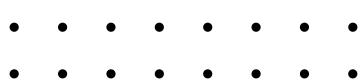

Now, developing and deploying ZK applications is possible for Solidity developers with just a few lines of code.

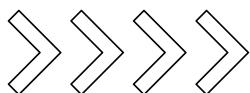

Manta Pacific is an environment where any Solidity developer can build and deploy ZK-enabled dapps using just native Solidity. Manta Pacific's Universal Circuits offers a ZK library for developers to integrate ZK features into their applications.

Now, developing and deploying ZK applications is possible for Solidity developers with just a few lines of code. ZK-enabled dapps mark the next generation of web3 use cases and adoption, as they provide stronger user safety and privacy measures while maintaining decentralization. Now, with Manta Pacific, there is a home for ZK dapps to develop and grow.
